

```
org::springframework  
::data::mongodb::repository  
::MongoRepository< Platform,  
String >
```

The diagram shows two class boxes. The top box is white and represents the `MongoRepository` class from the `org.springframework.data.mongodb.repository` package. It contains the text `org::springframework`, `::data::mongodb::repository`, and `::MongoRepository< Platform, String >`. The bottom box is gray and represents the `PlatformRepository` class from the `eu.h2020.symbiote.repository` package. It contains the text `eu.h2020.symbiote.repository.` and `PlatformRepository`. A blue arrow with an open triangle head points from the bottom box to the top box, indicating that `PlatformRepository` inherits from `MongoRepository`.

```
eu.h2020.symbiote.repository.  
PlatformRepository
```
